### 2. Reasons for revision

#### (1) Consolidated business results

Due to the effects of the global economic slowdown and the stronger yen, we have revised our net sales, operating income, and ordinary income figures.

We have revised our forecast of net income that reverts to parent company shareholders (previously announced May 8, 2015) owing to a loss on fixed assets at a Chinese subsidiary and other factors.

**(2) Non-consolidated business results**

In light of the recent earnings trend, we have revised our net sales, operating income, and ordinary income figures. Regarding net income, the real value of an investment in a Chinese subsidiary has fallen drastically, causing us to realize a loss on investment in an affiliate company. As a result of this and other factors, we have revised our net income forecast (previously announced August 4, 2015). This loss on investment in an affiliate company will be eliminated from consolidated results, so it will not affect consolidated earnings.

\* The figures of the above business results forecast are based on the Company's assessment of information available as of the date of this announcement. Actual business results may differ from forecast figures for various reasons.
